# **EXACTAPPLY™** **PERFORMANCE UPGRADES**

**Deliver the right drop in the right spot and achieve high level of control for spray accuracy and efficacy.**

---

Controlling your spray means more control over profitability and productivity. Minimize over-application, crop burn and off-target drift by upgrading the sprayer you already own.

## **PRECISE SPRAY RESOLUTION ACCURACY**

with high frequency pulsing at either 15Hz or 30Hz. Apply a uniform droplet size for consistent coverage throughout a wide speed and rate range. Reduce the chance of herbicide resistant weeds with uniform spray coverage.

---

## **SWITCH BETWEEN TWO NOZZLES**

from the cab with two operation modes - automatic or manual. Apply consistent droplet size using 3 options (A, B, A+B). Improved spray control by managing drift and ensuring rate accuracy.

---

## **CONSISTENTLY ACHIEVE TARGET RATE**

across the width of boom when making turns in the field. When pulsing is set to Auto, turn compensation automatically adjusts the duty cycle (pulse length) of each nozzle to account for varying speeds during a turn.

---

**No need to trade your current sprayer – give us a call today to upgrade your sprayer to ExactApply™**

# **EXACTEMERGE**

## **PERFORMANCE UPGRADES**

## **ELECTRIC DRIVE UPGRADES**

# **EXACTEMERGE™**

***Ships as a complete row-unit for faster installation time.***

- *Maintain accurate seed placement at speeds up to 161km/h (10 mph)*
- *Industry exclusive BrushBelt™ uniformly carries seed from the motor to the trench, reducing seed roll in the furrow*
- *Dual 56-volt electric motors provide infinite seed placement*
- *20% improvement in population accuracy with curve compensation*
- *Compatible with ExactShot™*
- *Unlocks additional features like Easy Adjust row cleaners, Individual Row Hydraulic Downforce and pneumatic closing wheels*
- *Exclusive upgrade: 1.6 bu or 2.7 bu hoppers available for non CCS planters*

***Improve your yield potential and profitability  
by upgrading your current machine!***
